Rayyan Borg

Marketing Analytics Manager | Marketing Measurement, Effectiveness & MarTech

London, UK · +44 7706 993100 · rayyan.borg@outlook.com · linkedin.com/in/rayyanborg · github.com/MrRayyanBorg

PROFILE

Marketing Analytics Manager with 6+ years' experience in marketing measurement, effectiveness and MarTech. Owns measurement strategy and infrastructure at GMAC, the organisation behind the GMAT, after building MMM, multi-touch attribution, LTV and revenue forecasting models at Heathrow and Croud. **Promoted twice in four years at 59A**, rising to Senior Marketing Data Analyst and Pod Lead managing three analysts for clients including Netflix, Coca-Cola and Pizza Hut. Makes marketing data trustworthy, then turns it into clear decisions on budget, channels and customers.

CORE SKILLS

Measurement & MarTech	GA4, Google Tag Manager (GTM), Google Consent Mode, OneTrust, conversion tracking, UTM governance, data quality, Meta Pixel, HubSpot, Salesforce Marketing Cloud, Search Console, Microsoft Clarity
Marketing Effectiveness	Marketing mix modelling (MMM), multi-touch attribution (MTA), incrementality testing, A/B testing, revenue forecasting, LTV, marketing ROI, budget allocation
Leadership	Analytics leadership (pod of three analysts), stakeholder management, agency and partner management, client delivery, executive reporting, KPI frameworks
Data Analytics & BI	SQL, Python (Pandas, scikit-learn, PySpark, GeoPandas), Databricks, Apache Airflow, AWS Redshift, Power BI, Tableau, Looker Studio, ClicData
Channels & Insight	Paid search and social, programmatic, CTV, display, email and CRM, SEO; Google Ads, Meta Ads, Xandr, Semrush, Talkwalker; marketing intelligence

PROFESSIONAL EXPERIENCE

Marketing Analytics Manager | **GMAC** Jul 2026 – Present

Graduate Management Admission Council, global owner of the GMAT exam. DXT Audience Team, London (hybrid), partnering with Brand, Paid Media, Product, Editorial and CRM teams.

- Own measurement strategy and tracking architecture for **mba.com, gmac.com and AdmitMe** (three GTM containers), reviewing and publishing agency tag changes so teams plan spend on compliant data.
- Restored mba.com data quality by fixing a GA4 fault that left **60%+** of landing-page traffic (**~21K users a month**) unattributed, and resolved a live site outage caused by **15** auto-configured Meta Pixels.
- Exposed a cart-abandonment measurement gap: only **~1,000 of ~9,000** users reaching the GMAT cart in a month entered the abandonment email flow, and registrations were losing campaign attribution, both due to tracking gaps on Pearson VUE's domain. Designed a consent-safe fix.
- Showed the Resource Library drew **77M+** search impressions but only **~410K** clicks in six months (**0.53%** CTR), pinpointing the pages and templates with the biggest organic traffic upside.
- Built lead funnel tracking for **13** gated guides and an engaged-candidate KPI joining GA4 with HubSpot CRM, showing which content drives leads and which candidates to prioritise for nurture.
- Created the Brand Momentum Index, a monthly five-pillar score blending web, social listening and email data, giving the brand team a single read on brand health across priority markets.
- Manage stakeholders across Product, Enterprise Products, Paid Media and Pearson VUE on measurement initiatives, including CVENT event tagging, and run a weekly Microsoft Clarity UX review for the design team.

Senior Marketing Data Analyst | **Heathrow** Aug 2025 – Apr 2026

Customer and campaign analytics at the UK's busiest airport (84.5M passengers in 2025), including Heathrow Rewards.

- Built bottom-up revenue forecasts by channel from traffic, conversion rate, CPA, AOV, retention and LTV assumptions, showing stakeholders how top-of-funnel activity translated into revenue.
- Measured campaign performance, incremental uplift and revenue contribution through Databricks pipelines in SQL and Python unifying transaction, CRM, campaign exposure and promotional data.
- Delivered segmentation, retention and lifecycle analysis for Heathrow Rewards, sharpening audience targeting, offer personalisation and multi-channel communication planning.
- Designed executive Tableau and Power BI dashboards and supported KPI standardisation and Salesforce Marketing Cloud automation, giving Marketing, Retail, CRM and Communications one view of performance.

Senior Marketing Data Analyst (Fixed-Term Contract) | **Croud** Feb 2025 – Jul 2025

Marketing effectiveness, attribution and forecasting for clients of a global digital marketing agency.

- Built marketing mix models and multi-touch attribution frameworks in Python and SQL, measuring the incremental impact of paid media, pricing, promotions and channels on demand, revenue and acquisition.
- Modelled customer lifetime value by acquisition channel to compare the quality of customers each channel delivered, informing budget allocation and retention strategy.
- Built bottom-up channel forecasts (impressions, clicks, CVR, CPA, AOV, revenue, retention) for monthly and annual planning, and automated Power BI and Tableau dashboards for real-time reporting.
- Cut data latency by **30%** with media strategists, data engineers and clients by improving data reliability, attribution logic and refresh cycles, giving teams fresher data for in-flight campaign decisions.

59A | Ad-tech and analytics consultancy Nov 2020 – Jan 2025

Senior Marketing Data Analyst / Pod Lead 2022 – 2025
Senior Marketing Data Analyst 2021 – 2022
Marketing Data Analyst 2020 – 2021

Promoted twice, from founding-team Marketing Data Analyst to Pod Lead of three Data Analysts. Clients: Netflix, Coca-Cola, Pizza Hut. Completed a BSc degree apprenticeship (2:1) alongside the role.

- Managed a pod of three Data Analysts as Pod Lead, setting priorities, quality-assuring client deliverables and developing the team, while staying hands-on in SQL, Python, attribution and dashboarding.
- Helped scale the founding analytics function as 59A grew from start-up to high-growth consultancy, delivering measurement and performance analysis for brands including Netflix, Coca-Cola and Pizza Hut.
- Analysed performance across six channels (programmatic, paid social, video, CTV, display, CRM), giving clients clear evidence on channel performance, audience behaviour and budget efficiency.
- Built reusable Python and SQL data models joining spend, impressions, clicks, CRM, conversion and revenue data, and automated client reporting and proposal packs with Python templating and parameterised SQL.
- Built GeoPandas catchment and postcode-level media planning models, informing local budget allocation.

Earlier: Marketing Data Analyst, **Unitu** (Aug 2020 – Oct 2020), Python NLP and sentiment analysis of student feedback for Product and UX · Data Analyst Intern, **Bank of America Merrill Lynch** (2018)
